

About Us

The company has been at its present location since 1972 and is managed by the Second generation of the Pahuja family. The company was started by Late Mr. C.L Pahuja in 1972, by founding a Maha Luxmi Metal Industries, steel rolling industry was set up for manufacturing Stainless Steel raw materials, in sheets, at Group Industrial area, Wazirpur, New Delhi, It is Asia's biggest stainless steel raw material producing area, during the era when the trend of stainless steel has just begun, "Wazirpur Industrial Area"

From 1972-1985, the company was engaged in manufacturing of stainless steel raw materials in form of Sheets & circles to cater domestic markets to make finished utensils of sheets, circles, blanks. He had never compromised with the quality ever in his life.

From 1985 -1996, he extended his business from manufacturing to exports of Sheets, Circles, and Blanks to south Asian countries.

After sad demise of Mr. C. L. Pahuja, in 1996, the company was reincorporated as Legends The Merchant Group, by his son, Ram C. Pahuja in 1999.

LEGENDS group developed the know-how to manufacture perforated screens which has been our core business since. Over the years we have expanded our product lines and our facility to include various Stainless Steel, Brass & Copper metals from raw material to finished products.

Legends group has built its reputation on "personalized service" and appreciable quality. Our mission is to achieve the highest degree of customer satisfaction possible by delivering our good quality products on time.

The Company has experience doing one job well: supplying perforated metals and material in coil, full size sheet, and cut to size blanks. Legends group is known for the good quality of its perforated metals at very economical prices. We continue to focus on offering our customers perforated solutions to help them grow.

Our customers include perforators, Dealers, Fabricators & original equipment manufacturers.

Perforated metal is versatile solution that Legends Group can provide. It is a lightweight, attractive, and economical alternative to other material.
